ENGINEERED LIGHTING SOLUTIONS

Vision X lighting fixtures are not merely lighting systems, they are engineered lighting solutions. They provide increased efficiency, increased safety, decreased environmental impact, and decreased costs. Vision X LED lights offer a large increase in energy efficiency over older technologies while also increasing the safety and productivity of the working environment by outputting 80% more light than the fixtures used previously.

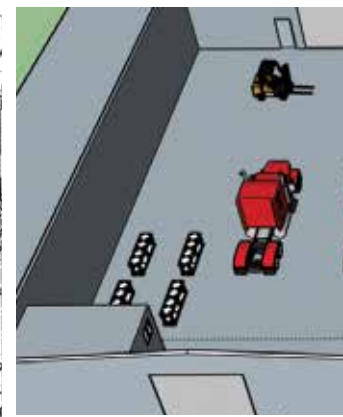

SOLUTION PROCESS

2D BLUEPRINT

Vision X Lighting begins each project with a customer provided list of applications to retrofit, then gathers the technical information for those applications.

3D MODEL

A 3D model is built to the customer's specifications, then carried over into the rendering.

SIMULATION RENDER

A simulation rendering ensures the final product will meet the customer's lighting requirements.

SOLUTION

Vision X Lighting creates a complete breakdown of the customer's specific needs to meet their lighting and safety requirements.
